

Setting Up BlackBerry® Email

Setting Up an Email Account

Support for email accounts and email setup may vary by service provider.

Email setup is done through your wireless service provider's BlackBerry Internet Service website. Every service provider has different steps to create an email account. However, once you log into your account and access the email setup section, you will need the following information:

- Email address — full email address
- User name — full email address
- Password — email password
- Server address — secure.emailsrvr.com

Note: If you need further assistance, please refer to the

[RIM BlackBerry email setup page](#) .

You can also contact your service provider for specific instructions for their site.
